---

A marketing authorisation application must be submitted before the deadline indicated on the approval regulation for the active substance with the latest approval date. For example, your product contains substance X belonging to PT8 and substance Y belonging to PT18. If the approval regulation for substance X states a deadline of 01/05/2018 and that for substance Y a deadline of 01/11/2018, then your application must be submitted no later than 01/11/2018.
